Computing Science Articulation Committee
Institutional Updates

Institution: The King's University

1. Program changes (new or deleted courses or programs of study)

   Current:
   - Adding new computer class CMPT460: Cryptography, cross listed with MATH 460. First offering January, 2018.

   Previous (recent):
   - Added CMPT375: Introduction to Artificial Intelligence, first offering January, 2017
   - Removed CMPT355: Introduction to Computer Forensics

2. Admissions requirements changes for high school and transfer students
   - Nothing to report

3. Admission or transfer trends or issues
   - Nothing to report

4. Any new transfer agreements – courses, block transfer, or new partner institutions

   - We have been reviewing agreements for courses in university transfer programs at the colleges (eg. Red Deer College and GPRC) to make sure we have active/accurate agreements for all courses in these programs.

5. Other updates (new or retiring faculty, new facilities, etc)
   - Nothing to report

   - Please note we will begin our program review this coming year, which may result in program changes for subsequent years.
