

## SAIT Dual-Credit Student Feedback

“Just keep offering this opportunity because it truly is amazing” - dual-credit pre-employment carpentry student (SAIT)

### **Did this program help you improve in other areas?**

Yes, it's a different learning experience in post-secondary than high school. That experience helped me change my perspective on how I learn in class

Yes, it has showed me the importance of completing high school in order to achieve a good career

Yes definitely, I've focused more on high school since I applied to be in this program. I've worked harder and last year I was failing math but I passed to get into the {dual-credit} program

Not so much, it is nice to have a type of class that isn't always in the 'classroom' so it seems as another way to let your mind work with a hands-on approach

I feel the program motivated me a lot and showed me I am capable of achieving good grades in school

Yes. Got me to actually go to class

The environment felt great and I feel I was capable to accomplish much more in this program than I was able to in high school
